

Technical Rider

Frictions

Technical Coordinator : Ian Yaworski
Choreographers : Philippe Meunier et Ian Yaworski
Number of performers : 5
Length : 30 minutes no intermission
In situ dance performance

Setup:

Choreographers identify the location of the performance three (3) hours before show and no setup is required. Frictions team is 100% independent.

Representation space :

The show adapts to the place as it is. Floor coverage may vary. A clean and safe surface of grass, stone dust, concrete, asphalt or wood, flat or slightly raised.

The public follows the performance (on the move) throughout the entire journey.

Sound :

The company provides all the necessary equipment for the performance. The company manages all the technical aspects of the representation.

Provided by the company :

- Portable Speaker
- MP3 player for music playback.
- All the necessary wiring

Lighting :

Additional lighting might be required if the performance takes place indoors or outdoors in the evening.

Dressing room : A space that can accommodate 6 people and clothes racks. Access to a drinking water point (otherwise provide a minimum of 6 bottles of water, preferably reusable) and a toilet (nearby).
